Product Name	Request ID	Registration Number
Fish Sh!t	CAS-2023-28221	2021972S

Ruth Roberts,

We have completed our review of the above-mentioned product. Based on the information that the Canadian Food Inspection Agency (CFIA) has reviewed, we have determined that this product meets all requirements as outlined in the *Fertilizers Act* and regulations and may be legally imported and sold in Canada. Therefore, the above product has been amended under the *Fertilizers Act* until **August 3, 2028**. **All labels associated with this product found in the marketplace must contain the registration number stated above and as shown on the registration certificate available in My CFIA. Please note that the suffix of the registration number has been revised.**

Enclosed with this letter, you will find a copy of the approved label. Please ensure that the actual product labels found in the Canadian marketplace are the same as the enclosed label. Please be advised that the presence of the CFIA stamp, on the final label is only as a symbol of approval and the reproduction or use of the CFIA stamp on labels in the marketplace is prohibited and subject to enforcement. Please note that all products are required to bear a lot/batch number on the product label. As well, please ensure that all advertising claims regarding the benefits of this product and how this product should be used are limited to those identified on the approved label.

Please note that as new regulations and/or policies are developed, the acceptability of this product under the *Fertilizers Act and Regulations* may also change. It is the responsibility of the manufacturer/registrator/distributor/retailer to ensure that the product and the label continue to meet the requirements for sale in Canada, as outlined in the *Fertilizers Act and Regulations*.

Please note that an amendment to your registration must be submitted to the CFIA and approved prior to making any changes to the label (including directions for use), chemical composition, or constituent materials of the product, if the change could reasonably be expected to affect its performance as a fertilizer or supplement, its safety or its use.

As the registrant, you must be aware of the date that your product registration expires (found on registration certificate), and submit a renewal application **before, the stated expiry date**. Applications for a **renewal without changes** (i.e, no changes to the constituent materials, manufacturing process, or directions for use) should be submitted at least four months prior to expiration from the previous registration.

Applications for **renewals with changes** should be submitted one year in advance of the registration expiry date to provide the CFIA with adequate time to review the application and confirm that the proposed changes do not cause the product to pose an incremental risk to human, animal, plant, or environmental health. If applications to re-register products are not submitted within these timelines, the CFIA may not be able to process the application to re-

register your product before the product's registration lapses, rendering it ineligible for import or sale in Canada.

Registered products whose registrations were issued through the **My CFIA** electronic submissions platform will receive electronic notifications that expiry dates are nearing (and if necessary, that a registration has expired). However, it remains the responsibility of the registrant to submit re-registration applications in a timely manner to avoid a registration lapsing. **Please note that the renewal must be submitted through our electronic platform My CFIA.**

If you require assistance to submit a re-registration, please contact the Pre-market Application Submissions Office (PASO) by e-mail at: cfia.paso-bpdpm.acia@inspection.gc.ca (ensure the word "fertilizer" is in the subject line) or visit our website at the following:
<http://www.inspection.gc.ca/english/plaveg/fereng/ferenge.shtml>

Please contact me should you have any questions regarding this registration letter.

Sincerely,

Derek Curley
Senior Evaluator
